

## Mixedness

This meme refers to the work of Henry Yu (as described by Sitara, 2019), who attacks the idea that interracial marriage and sex in and of itself will solve racism. Yu argues that the crossing of racial barriers through sex and marriage may not serve to highlight the fact that they are constructed, but may instead reinforce them as real. Yu argues that interracial relationships must not be thought of as inherently subversive because they do not necessarily do any work to deconstruct racial hierarchies. Instead they may reaffirm the existence of said hierarchies.
