

Imperialism and Capitalism

COLONIZE ALL THE THINGS

This meme discusses Europe as an imperial power in a really basic way. It refers broadly to the colonization of Africa, Turtle Island, South America and pieces of Asia. While capitalism is not discussed explicitly in the meme, I believe that it is important to understand these colonial efforts as capitalist efforts. The theft of lands, bodies and resources were all undertaken in the interest of gaining capital for a very small number of wealthy and powerful people.
